

# Custom Configuration and Admin Pages

## Add Content to Built-In Sections

The screenshot illustrates the process of adding custom content to built-in sections in the TrakSYS Configuration page. The interface is divided into three main sections: Configuration, Developer, and Administration.

**Configuration Section:**

- Sections:** A list of built-in sections is shown on the left. The **Configuration** section is selected, and a **+ New Hub 1** button is highlighted. A red arrow points from this button to the **Custom Hub 2** entry in the **Systems** section.
- Systems:** A list of built-in systems is shown on the right. The **Custom Hub 2** entry is highlighted, and a red arrow points from it to the **Custom Hub 1** entry in the **Configuration** section.

**Configuration Section Details:**

- Sections:**
  - QMS (/Qms/)
  - ISMS (/Isms/)
  - Assets (/Assets/ | ETS.DefaultContent)
  - Project ADO (/ProjectAdo/)
  - Test (/Test/)
  - Configuration** (/config/ | default)
- Systems:**
  - systems/ | ETS.Configuration.Slices.Nav

**Configuration Section Content:**

- Systems**
- Tags**
- Products**
- Categories**
- Schedules**

# Custom Configuration and Admin Pages

## Custom Operations

The screenshot displays the TrakSYS configuration interface. On the left, a sidebar menu shows 'Developer' as the active section, with sub-items: Page Definitions, Content, Library, Scripts, Modules, Workflow, and Operations. The main content area is divided into two panels. The left panel, titled 'Import Products', shows the 'Entity Operation' configuration. It has tabs for 'General' and 'Notes'. The 'General' tab is active, showing a 'Name' field with the value 'Import Products', an 'Entity' field with the value 'ProductSet', and a 'Data' field containing XML code. A red box highlights the 'Name' field, and a red arrow points from it to the 'Import Products' link in the right panel. The right panel, titled 'Products', shows the 'Packaging' section. It has a list of products, with 'Import Products' highlighted. Below the list, there are sections for 'Related' (Products, Groups, Maps, Audit Trail) and 'Actions' (Enable Versioning, Disable, Delete). At the bottom of the left panel, there are 'Apply', 'Save', and 'Cancel' buttons.
